Uzbekistan, Tashkent Location

Dear admission committee

I am writing to express my interest in the summer school program university EPFL computer programming and computer management . I always interested in summer schools in abroad but I could not go because I was very young therefore I went to local summer schools . In my opinion summer schools helps human to improve his knowledge skills which he learning something .

Mostly while I studying in university as first year student . That's why I am going to improve my knowledges about computer programming in summer of 2022.

I finished lyceum as computer programmer . At the present days I am learning at Public Safety university in Uzbekistan faculty of economy together with I go to the web developing courses(Frontend developer and I finish this course in December of 2021) . So therefore after that I am going to continue development of my computer skills in this summer school more and so on.

In 2020 I finished my English (IELTS) study and got score 5 certification (November of 2020). So I can say that was a one most important action in my life.

Then in May of 2021 I finished Turin polytechnic lyceum under TTPU(Turin-Tashkent Polytechnic University) as junior programmer .After that I started to study Frontend developing courses (from 1<sup>st</sup> of July of 2021). In September I applied University and still studying there .

I believe that I really can improve my knowledges in summer school of EPFL university . Because when I read about study program of this summer school I really liked it . Additionally I liked EPFL university too . That's why I am planning to continue second year of my bachelor study in EPFL. My I finish first grade of university in late May . I hope that I successfully finish 1<sup>st</sup> grade of university plus summer school of EPFL. Mostly I wish that I apply to university EPFL successfully as 2<sup>nd</sup> grade bachelor . My dear friend(my friend which suggested me this summer school) said that I really can feel myself confident at my profession(computer admin and computer engineer together with full stack developer ) which I am going to get after this summer school.

Your sincerely  
Ali Davronov
